THE REDCLIFF REVIEW

THURSDAY, OCT. 19th 1938

Number 18

Literary Meeting Was Held Here on Monday

Meeting Strong for Irrigation in Redcliff and Resilience

A Liberal Association meeting for the purpose of organizing the Redcliff Hat was held in the Town Hall Monday.

Officers were elected and delegates appointed to the Liberal Convention in Medicine Hat on Wednesday.

The delegates were instructed by the meeting to make strong representation for the immediate consideration of the Redcliff Resilience Irrigation scheme.

Rebekah Sale and Tea Well Attended

Was Held in I. O. O. F. Hall Last Wednesday Afternoon

The sale of fancy work and afternoon tea which was sponsored by the members of Vega Rebekah Lodge and held in the I. O. O. F. Hall last Wednesday afternoon was well attended in spite of the inclement weather.

Several ladies from Medicine Hat were present. Master Kipp Hignault won the cut-work luncheon cloth which was raffled during the afternoon.

"Big Sister" Makes Discovery

Ruth Evans discovers that Harriet Durant is still scheming to inherit Dr. John Wayne, during the "Big Sister" sketch to be broadcast over CFAC Friday, October 12.20 to 12.35 noon. Harriet, a lovely looking young socialite, has persuaded John to give up his medical practice and run for Mayor of Ravelton to avenge the persecutions of Asa Griffin, ruthless and corrupt political boss.

When the music for "Radio Theatre" is announced as "back ground music", that's what it really is. Lou Silver conducts the orchestra behind a backdrop.

"SHADOWLAND"

A pleasant way to bring the day to a close is "Shadowland" presented daily at 11.45 p.m. over CFAC. Organ music is featured, with Cecil Kappay at the console. Additional artists include Stan James, well known accordion player, and Jack Lee, "the singing usher". The program, as its title suggests, is given over to the rendition of quiet, restful music conducive to pleasant dreams.

SCHOOL NEWS

Once again the students met in the School Auditorium on Friday Oct. 7th, for another Literary Society meeting.

The business part of the meeting was occupied by electing a new improvement committee which was formed by Zeida McKay, Hilda Humphrey and Gordon Shabby.

An interesting and exciting spelling match followed between the Grade Sevens and the Grade Eights. The Grade Sevens won by the outstanding score of 15-6.

As a change in the program the school paper was read by the editor, May Martin and Betty Balmer, accompanied by Doreen Cooke on the piano, showed their talent in singing that well known song "Sweet and Low", also an interesting "Little Old Cathedral in the Pines".

The spelling match was then continued between the winners and the Grade Nines. The score proved to be 13-11 in favor of the Grade Sevens.

This ended another entertaining meeting which we hope the coming meetings will be followed out in the future.

M. L.

Mr. and Mrs. J. Kerr of Calgary are visiting friends in town today.

Little Virginia Podesta, two year old daughter of Mr. and Mrs. E. Podesta, had the misfortune to break a bone in her foot while at play recently. The little girl will wear a cast for eight weeks.

Mr. and Mrs. Jas. Waters Sr. of Vancouver, who have been visiting here for the past month with their daughter, Mrs. George Myers and Mr. Myers returned to the Coast last Wednesday.

This Thursday, Friday and Saturday will see the Annual Shopping Festival of Medicine Hat in full swing again. The weather having turned a bit cold, we do not doubt many country folk will be in town to purchase their winter supplies.

Miss Shirley Barr who was seven years old last Friday celebrated the occasion with a delightful birthday party to which sixteen of her little friends had been invited. The birthday table was lovely in a color scheme of green and yellow and was centered with a pretty birthday cake adorned with seven lighted tapers. Shirley presented each of her guests with a pretty gift in remembrance of the day which no doubt added much to the happiness of the little folk.

It has been officially announced that our King and Queen will visit Canada next summer.

Dr. Gershaw Selected Candidate at Meeting

Was Held in Medicine Hat on Wednesday Evening

The Liberal Convention in Medicine Hat Wednesday was well attended by delegates from all parts of the constituency.

Dr. Gershaw was nominated by acclamation as the Federal Liberal party candidate. The nomination was enthusiastically received.

The meeting was addressed by the president of the provincial Liberal Assn. and Minister of Transport, Howe.

We wish to correct an error which appeared in the Review of last week. We said that Mrs. Robt. Stratton was the sister of the late Kenneth Blaney. This should have read Mrs. Eli Shaw was Kenneth's sister.

St. Ambrose Sr. W. A. will hold its annual supper on Monday, October 24th, in the Parish Hall. Supper will be served from 5.30 to 7.00 p.m. Admission: Adults 35 cents, Children under 12 years 20 cents. Cards will be played at 8.00 o'clock. Evening Admission 25 cents.

Mr. A. R. Ballantyne returned on Friday after a month's absence. He was called to the illness and subsequent death of Mrs. Ballantyne's sister, Mrs. Harrison. Mrs. Ballantyne is expected to return at the week end and accompanied by her nephew, Billy Harrison, who will now make his home in Redcliff.

APPLICATIONS WANTED

We have fine localities open around Hanna, Yellowknife, Pelkovich, Coniston, Monitor, Open, Big Valley. Applicants must be neat, reliable and hard workers and have car or suitable travel outfit. An opportunity to get established in your own business. For particulars regarding other localities apply to THE J. R. WATKINS CO. Dept. R57 Winnipeg, Man.

WE INVITE YOU TO VISIT THE COFFEE POT Short Orders & Light Lunches, Soda Fountain Service Next To Monarch Theatre - 2nd Street MEDICINE HAT

Their Majesties hope to arrive in the early summer and spend about three weeks in our Dominion.

Much Goods Stolen From Wong's Garden

Cantaloupes, Corn and Geese Have Been Stolen

Charlie Wong local Chinese gardener has been the victim of the annual sneak thief or thieves. He has been robbed of large quantities of cantaloupes, corn and even his geese have been stolen. This is a dirty trick and the culprit or culprits should be found pronto and forced to replace in goods or money what they have stolen.

Fuel Oil Price is Being Investigated

Appointment of Two-man Royal Commission to Investigate

The appointment of a two-man royal commission to investigate fuel oil prices in Alberta and report on what should be a fair and equitable price for petroleum products sold to consumers in Alberta was announced Tuesday by Hon. E. C. Manning.

The commission was also empowered to study the production, refining, distribution and consumers' costs and submit recommendations for oral and written evidence.

The British house of commons' riddell Prime Minister, Chamberlain's peace deal with Chancellor Hitler at the end of a three-day debate. The government was sustained on the main motion of confidence 366 to 144, after a Labor amendment had been defeated, 369 to 150.

Mr. Chamberlain declared his conviction the Munich agreement had averted war. "I am equally sure I was right," he added. "I think the government deserve the approval of this house."

The government's peace policy, he claimed, saved Czechoslovakia from destruction and Europe from Armageddon.

Lads Working at New Skating Rink

Considerable Work is Now Being Done

During the past week considerable work has been done to get the new skating rink into shape for the coming winter. The rink has been well laid out and now a fence is being built around the grounds. Young men and officials are doing splendid work in the evenings for which they deserve much credit. This is a worthy undertaking and those who are bearing the brunt of the inevitable criticisms should be given every assistance and encouragement. With everyone pulling together there is no doubt we shall have a splendid rink and lots of healthful pleasure during the coming winter months.

A large crowd attended the dance in Bowell last Friday evening. The music was provided by Chapman's Orchestra.

The cash balance in the account for the purpose of replacing at cost goods sold by the merchants for which payment has been made by transfer vouchers; the Provincial Treasurer shall, in such case and for such purpose permit cash to be withdrawn to the full amount of the said replacement cost without the imposition of the said charge of two per centum 2%.

11. Pursuant to agreements made in that behalf with depositors with the Treasury Branches the Provincial Treasury will credit the account of all ultimate consumers purchasing goods from his account in the said Treasury Branch with an amount not exceeding three per centum (3%) of such portion of the deposit used in the purchase of the said credit to be based upon the purchase of Alberta-made goods purchased during each month during which the said deposit is maintained, that is to say, if not less than thirty-three and one third per centum (33 1/3%) of all purchases of the said goods are Alberta-made credit shall be given not exceeding three per centum (3%) of the sum total of the goods purchased, if less than thirty-three and one third per centum (33 1/3%) the credit to be given shall be correspondingly decreased.

12. For the purpose of this contract "Alberta-made goods" shall mean such goods, wares and merchandise grown, produced, manufactured or processed in Alberta which bear a label or other identification mark issued under the authority of the Minister of Trade and Industry or which are listed by the minister as Alberta-made goods.

Credit Houses Being Established in The Province

Merchants Expect to Co-Operate With Credit Houses

In connection with the provincial credit houses which are being set up merchants are expected to co-operate in keeping the new purchasing power moving. The following is the memorandum of agreement which the merchants will be asked to sign.

1. The merchant will accept in payment for goods sold, transfer vouchers drawn by the purchaser upon the account of the purchaser in a branch of the Provincial Treasury.

2. The merchant will open an account in a branch of the Provincial Treasury and will utilize as far as possible the services of the said branch.

3. The merchant will keep such records and from time to time furnish to the Provincial Treasurer such statistical information as are necessarily required.

4. The merchant will, in proper cases and when requested so to do, issue slips or invoices or other satisfactory documentary evidence of a sale of goods, and will endorse thereon, a certificate or notation that the said merchant has accepted in payment for the said goods, transfer vouchers drawn by the purchaser on the latter's account in a Treasury Branch.

5. The merchant will complete the information required by the form of the transfer vouchers prescribed by the Provincial Treasurer.

6. In the absence of such special agreement as may be made between the parties, the merchant agrees that the Provincial Treasurer may make reasonable charges at his discretion for keeping the account herein provided for, and the Provincial Treasurer is hereby authorized to debit the account so charged.

7. The merchant agrees that some sign or mark identifying the merchant and evidencing the fact that he has entered into this contract may be affixed to such part of the premises of the merchant as may be agreed upon between the parties.

8. The merchant will use his best efforts in the conduct of his business to advance the sale of Alberta goods.

9. The Provincial Treasurer will establish and maintain branches of the Department of the Treasury (herein referred to as "Treasury Branches") at such points as he may deem convenient.

10. The merchant agrees that the Provincial Treasurer may make a charge of two per centum (2%) on all cash withdrawals in excess of the balance of cash standing to the credit of the merchant's account at the time of the said withdrawal; provided that upon being satisfied that such cash withdrawal in excess of

The Big Four

When one considers that a few simple and inexpensive precautions could prevent a great deal of it, it seems incredible that the annual property loss by fire in the three prairie provinces, despite a general downward curve in the past six years, still hovers around the million dollar mark in each of those provinces.

During the period, 1932 to 1937 inclusive, the annual toll paid to the fire demon in Saskatchewan and Alberta has averaged over a million dollars each with the Alberta figure jumping to a million and a half in 1937. In the same period Manitoba's annual tribute to flames has averaged around \$500,000.

Expressed in per capita figures—for that is the true test of the comparative cost of carelessness where fire is concerned—the loss in 1937 ranged from \$1.93 per head of population in Alberta to \$1.12 in Saskatchewan with the Manitoba loss standing at \$1.24 in the same year.

While it is a matter of congratulation that these losses are materially less in each of the provinces than in 1931 and 1932, roughly reduced by fifty per cent, the losses are still much greater than they need be. If a few simple protective measures which are available to every person at a little expenditure, of either time or money were adopted, and if people would not forget that danger is ever lurking where fire in any form is used.

Results Of Forgetfulness

Too much stress cannot be laid on the injunction to remember at all times that where there is fire there is risk, for there are few who have reached the age of discretion who are not aware of the dangers and the measures that should be adopted at all times to minimize them. Disaster is not usually the result of lack of knowledge but of forgetfulness.

That is the reason for the value of fire prevention week. Coming as it does at the season of the year when preparations are being made to maintain warmth for the winter months, it serves as a reminder of the necessity of taking precautions to prevent disaster and loss at a time when danger is accentuated, or rather, when additional risks loom on the horizon.

Analysis of statistics and information in the possession of superintendent and commissioners of insurance show that in the three prairie provinces the bulk of the fire loss is comprised of small buildings and their contents. In 1937 there were comparatively few large conflagrations except in Alberta where large buildings and contents to the value of over half a million dollars at half a dozen points went up in smoke. It also demonstrates that the greatest percentage of loss is in small villages and in the rural districts.

This is not surprising when it is remembered that the cities and larger towns are equipped with efficient fire fighting forces and apparatus, water-works and fire alarm systems and a convenient telephone system which protect the urban residents from the consequences of their carelessness. Were it not for these facilities the losses in the urban centres would be appalling.

The information in the possession of these offices also demonstrates that on the prairie the fire losses have four very active disciplines, the four, who serve his cause faithfully. They are (1) Cigarettes and careless smokers; (2) Defective chimneys; (3) Overheated stoves and stove pipes; and (4) Gasoline and other inflammable liquids.

The evidence further supports the contention of government officials that the bulk of the loss is sustained first by dwellings and their contents and secondly by barns and other farm buildings exclusive of residences.

Much Is Avoidable

These facts and figures demonstrate very clearly that a very large percentage of this loss could be avoided were it not for lack of thought or lapses of memory.

The information suggests to anyone who cares to give the subject a moment's thought the vital necessity of periodic and careful inspection of all heating apparatus in the home, of the importance of seeing to it that stove pipes and chimneys are cleaned and kept clean and that if a stove is too close to framework fire safety to move it out.

The facts and experience demonstrate that natural gas and weeds growing up near a house or other building should be cut, raked up and removed and that hot ashes should not be placed where wind may carry sparks to ignite a combustible structure.

Experience also shows the wisdom, where stubble is to be burned, of striking to the law which requires that dumpings of 20 feet or more be plowed around the field to be burned off and that three men be on hand to prevent the flames from getting beyond control.

If these and other precautions with respect to the use of gasoline, coal oil and ignited smoking materials were strictly followed at all times, the fire losses in the prairie provinces would be reduced to an almost negligible figure, to say nothing of the lives that would be saved and the injuries that would be avoided.

More Doctors Than Lawyers

Canada Has One Physician For Every 1,609 Persons

The last census showed over 8,000 persons occupied as lawyers in Canada and 144 judges and magistrates, not all of whom were necessarily graduates of law schools, but most of whom are likely to be placed as such. There is thus one lawyer for every 1,300 of the population and there is one doctor for every 1,609. It would seem to suggest that our bodily life take more looking after than keeping us within the rules by which society governs its actions—Kitchener Record.

A skating rink has been carved into an Alpine glacier, near the top of the Jungfrau.

Successful vaccinations against disease have been performed on all-worms. It is said.

Alfalfa In Surgery

Can Be Used For The Purpose Of Stanching Blood

Alfalfa hay has become an important item in modern surgery, according to Dr. C. G. McEwen, professor of anatomy at the University of British Columbia.

"Alfalfa yields a certain product useful in surgery," Dr. McEwen said in an address at a farmers' field day meeting. "This product is applied for the staunching of blood. It causes certain coagulation which stops bleeding."

It is a common fallacy that all spring water is pure, and good to drink. Its purity depends upon the ground through which it seeps.

In Siberia, natives build their granaries on stilts so that freezing snows of winter will not cover them up.

Glad To Be Back

Italian, New Canadian Citizens, Likes

Joseph Festino, a resident of Stratford, Ont., has returned to that city after spending three months with his parents and other relatives in Italy. Before coming to Canada several years ago Mr. Festino had served time in the Italian army. Now he is a naturalized Canadian citizen. When he arrived in Stratford, he reports the Pittsburgh Examiner after reading about it in the Beacon Herald. Mr. Festino talked with a reporter. Going back to his old home had not made Mr. Festino think he had made a mistake in coming to this country or in taking out his naturalization papers here. He found the people in Italy were heavily taxed; his own phrase was "to the limit," and he was certain they enjoyed no such measure of freedom as we have here. They cannot come and go and leave their country as Canadians can. Mr. Festino says it is not right to state people in Italy are all working and happy. Many of them are out of work and many more who are working are not receiving enough to meet the cost of living, which is very high. The Stratford man says a loaf of bread much as we buy in this country would cost at least forty cents in Italy, and what we refer to as baby beef would be nearly one dollar a pound. The people in his native land are making sacrifices for their country, and it is a process which does not end. When one sacrifice has been made then there is a demand for another. The chief difference between Canada and Italy according to Mr. Festino is that here one can attend to his own affairs, mind his own business and be left alone. That is what he considers the highest and most desirable form of freedom, and it is something which he did not find in Italy. The man from Stratford was certain the people of Italy did not want any war, but the trouble is they have nothing to say about it.

Natives of Timbuktu bolt and eat hippopotamus steaks, with hides two inches thick left on.

Steel mills offer about five hundred products in 100,000 different shapes, sizes and finishes.

England has 20,000,000 fewer acres of farm land this year than in 1918.

Recruiting for Britain's Territorial Army is breaking past war records.

South Africa will spend \$60,000, on its railways.

Bird or gravel in the glaziers of birds is necessary for the grinding of food, since no modern bird is equipped with teeth.

In some South Sea Islands porpoise teeth are used for money.

More Elevator Space

Alberta Pool Needs More Facilities

At Vancouver, B. C. The Alberta wheat pool is seeking to lease additional terminal elevator facilities at Vancouver. It was learned at the head office in Calgary.

It is possible the pool may take over the Vancouver harbor board's No. 2 elevator, which has a capacity of 2,600,000 bushels.

Negotiations are under way with federal authorities and should the lease be obtained, the additional facilities would increase the pool's storage capacity at the coast to 6,000,000 bushels.

The pool's own terminal at Vancouver has a capacity of 5,500,000 bushels.

For the first time in three years the bulk of Alberta's wheat crop is travelling the western route to the Pacific terminals.

The westward movement is attributed to part to wheat board operations.

Pacific coast terminals have a storage capacity of around 21,000,000 bushels.

Drop Foreign Names

But Italy's Night Clubs Anxious For Foreigners' Patronage

Restaurants, cafes and night-clubs in Italy no longer to bear names of foreign origin, according to a circular issued by the National Fascist Federation of Places of Entertainment.

In future no restaurant may be called "Metropole," "Beau Rivu," "Belvedere" or "Ches Vostre," or have an Anglicized Italian name, lest it should recall the period of artificiality before the Fascist era. Night-clubs, such as "Monte Carlo Night," "Bagdad" and "Holly-Holly" must henceforth be rechristened "Night," "Villa d'Este" for "Ventes," as these names are considered mere in keeping with the Italian spirit of to-day.

There is to be no slackening, however, in efforts to entertain foreigners and in all restaurants a proportion of the staff must be able to address guests in their own languages.

Reports of fresh apples from Canada to Belgium in 1937 (10,500 quintals) were approximately six times as large as in 1936.

Bird or gravel in the glaziers of birds is necessary for the grinding of food, since no modern bird is equipped with teeth.

In some South Sea Islands porpoise teeth are used for money.

For Soil Erosion

Extension Of Forestry To Control

Flood Problems Extension of forest land gives much better mastery of flood problems than other methods, Dr. C. G. Bates of the United States forest service, St. Paul, Minn., said in a paper on "Reforestation and Flood Control" before the American Association for the Advancement of Science.

The term "flood control" is rather old since the beginning of the protection and protection, he said. Forestry's primary concern is with prevention. In the U.S. the opportunity for demonstrating the degree to which forest could retard and control water flow was never better.

Dr. Bates discussed principally the flood and farming problems of the great Mississippi Valley, where flood control, either by artificial reservoirs or better use of the natural reservoirs, is inextricably bound up with erosion control. Artificial reservoirs will have a short-lived value so long as sedimentation occurs to the present extent, he said.

It can be shown that well-kept forest land has practically unlimited possibilities for absorbing rainfall and preventing run-off and erosion, and hence that the extension of forest land gives much better mastery of flood problems than any other proposal. The limits are economic, not physical, and hence the problem must be approached in thoroughly practical, non-sentimental manner."

Was Servant Of Public

Prince Arthur Of Connaught Will Not Soon Be Forgotten

Prince Arthur of Connaught was a notable example of a man born to high position, rich in all the material things of life, who yet deemed himself first and foremost the servant of the public, who ever set duties of State before personal indulgence, and who undertook with unflinching cheerfulness onerous as well as simple tasks. His slim figure with its slight limp, was welcome everywhere. He mingled with the humbler as well as with the mighty. He was ever ready with a quip or a word of sympathy, and acts of sympathy more concretely expressed. Both army and navy loved him for himself alone. Though he had been out of the public eye for some years, owing to delicate health that pursued him all his days, yet he was not forgotten, and there will be made a poignant recollection and many a word of heartfelt regret at his passing—Montreal Star.

Some men are like caribou on the neck of progress.

Prince Arthur of Connaught will not soon be forgotten.

Asks Help Of League

Dr. Wellington Koo Says Millions Chinese Have Been Killed

Dr. Wellington Koo, Chinese delegate to the League of Nations, told the League assembly that no less than 3,000,000 Chinese had been killed since the beginning of the war with Japan July 7, 1937.

Dr. Koo said 30,000,000 others had been wounded or made homeless. Since Jan. 1, 1935, he said, there have been 2,204 Japanese air raids on civilian populations of China. He said more than 3,000,000 Japanese soldiers now are operating on Chinese soil.

China, Dr. Koo said, asked the League to:

1. Apply Article XVII—which provides the way for mediation in disputes between League members and non-members and is, therefore, a stepping stone to application of military and economic punitive measures.

2. Apply the resolutions of previous League council and assembly sessions by enforcing an embargo on arms, munitions, airplanes, oil, raw materials and cash against Japan and by giving financial and material aid to China.

3. Create new measures to deter Japan from using poison gas and "baiting" bombing of undefended towns and civilian populations.

Started As A Hobby

New 75-Year-Old Man Earns Living

Celebrating his 75th year, J. R. Webster of St. Helena in West Wawanosh Township, Ontario, believes "knitting" to be a "depression-buster."

Born in Ashfield Township, he worked as a laborer as a young man and then as a bookkeeper for 10 years on the famous Jay estate near Lucknow. Advancing in years when the famous depression came on, he decided to take up knitting as a hobby that might eventually help out financially.

His knitting was confined to socks and soon he began to get a demand for them. Men going up to work in the mines and pulp mills were hearty in their praise for the "all-wool" products of his hands. The demand increased, and so for the past number of years he has been constantly busy spinning "knitting socks."

Asked if he believes knitting to be a woman's job, he just laughs. "Of course it isn't. I like knitting, and whoever says it isn't interesting is a well, just like my crying threads from getting knotted."

Quite Used To It

Japan Has Average Of Four Slight Earthquakes Every Day

The typhoon which struck the Tokyo area and caused a heavy loss of life and property was nothing compared to the earthquake tidal wave on the sea which virtually destroyed Tokyo on Sept. 1, 1923, states the Detroit Free Press.

The property loss in the 1923 disaster was estimated at \$2,000,000,000.

And the casualty toll included 98,338 known dead, 43,676 missing and presumed to be dead, and 103,733 injured.

Japan is a group of volcanic islands with an average of four slight earthquakes a day and a very serious quake six or seven years.

We may not like some aspects of their foreign policy, but we cannot help admiring the resilience of the Japanese—some 7,000,000 of whom are crowded into an area, the tillable acreage of which is less than one-half that of California—and their ability to take the worst nature can hand them and come up smiling.

DALY T.C. EXPRESS SERVICE UNDERWAY

MORE PHOTOS OF STAFF OF THE FLIN FLON MINE

ZINC PLANT OPERATORS AT FLIN FLON, MANITOBA

—Photo by Hutcher & Hunsall, Regina and Flin Flon.

Over 100 in this group and they were nearly all born in Canada or the British Isles. From Manitoba 38, Saskatchewan 24, Ontario seven, Quebec five, New Brunswick and British Columbia one each, and seven from England, one each from Ireland and Scotland, the U.S.A. seven, and only 11 from all Europe. There are about 1,800 employees all told at Flin Flon.

MINERS OF THE DAY SHIFT AT FLIN FLON, MANITOBA

—Photo by Hutcher & Hunsall, Regina and Flin Flon.

All in their working kits, with rubber coats, pants and heavy knee-length boots. On their heads the protecting helmet made of a light tough material and in front their acetylene lamps. One hundred and fifty men in this group and between this and the night shift they get out about 4,500 tons of ore daily at Flin Flon.

NIGHT SHIFT MINERS AT FLIN FLON, MANITOBA

—Photo by Hutcher & Hunsall, Regina and Flin Flon.

There are 87 men in this group—too many to name individually, but it is interesting to note that 18 are from Manitoba, nine Saskatchewan, three Alberta, four Ontario, two Quebec, five England, four Scotland, two Ireland, and the balance from Poland, Czechoslovakia, Yugoslavia, Austria, Serbia, Roumania, Hungary, Lithuania, France, Sweden, Finland and only one from U.S.A.

It takes all kinds of men to make a mine!

WORLD HAPPENINGS BRIEFLY TOLD

Horatio Walker, distinguished Canadian painter and native of Lisle, Ont., died in his home at Island of Orleans, Quebec. He was 80.

Plans for a mass migration of 700 Memmories from Mexico to Canada apparently have been abandoned, according to immigration department officials at Ottawa.

H.M.C.S. Nootka slid into the water at Victoria, "slung" the Esquimalt plant of Yarrow, Limited, and was fourth Canadian naval vessel to be launched this year.

Approximately 50,000,000 feet of Main Timberland fell before the onslaught of the recent hurricane, Forest Commissioner Waldo N. Seavey estimated.

Continued increase in savings accounts and an increase in deposits with the Bank of Canada featured the Aug. 31 report of chartered banks to the finance department.

More emphasis on youth programs was urged before the general council of the United Church of Canada by Judge P. A. E. Hamilton of the Winnipeg juvenile court.

Drilling of a deep-dip well in the Lloydminster gas and oil field was started shortly, it was announced. The well will be drilled by a concern to be known as "Lloydminster Royalties."

A gold medal presented to John Bright, British reformer, by the Birmingham Liberal Association in 1883 is missing from its case in the Rockdale Art Gallery, the lock having been forced and a gilt replica left as substitute for the gold.

A German Name
Local "comet" seems not to be sure whether the word "Sudetan" is German or not. Irrespective of its origin, however, says the Toronto Star, it is (Lippincott's Gazetteer) the German name for the Sudetic mountains, and hence transferred to their inhabitants. The Sudetic range, or Sudetan, were known to the ancients as the Sudeti Montes.

Money is no homing pigeon; when it flies away it doesn't come back to roost.

Information For The Future

Scientists To Leave Instructions In 800-Pound Metal Letter

Five thousand years from now historians will receive an 800-pound metal letter, a "time capsule" containing information about the present age. It will be deposited 50 feet below the surface of the New York World's Fair grounds. And if future historians find the capsule, major credit will go to a Canadian physicist, Sherwin Kelly, former professor of geology and mineralogy at the University of Toronto.

Mr. Kelly, an expert in electrical prospecting, will direct future historians to the cache of the capsule in a book of record which will be preserved in libraries, museums and depositories throughout the world. The message in the book of record will tell how the capsule can be located, using present-day electrical prospecting methods.

The "time capsule" will also contain statements of this age's scientists, engineers, industrial, social, religious and philosophical achievements. Motion pictures will show how we look, act, talk, and what the ladies wear.

Reflects Public Opinion

No Government Can Change Unless Majority Of People Do

Government reflects public opinion. If you want a different kind of government, you must change public opinion. The individuals who make up governments—local, state and national, know a great deal about public opinion because that is the most potent force in their careers, and over a period of time they become past masters in forming public opinion, first, because they have heard it in very frequent elections, and second, the very offices which they hold give them the chance to give them standing in the court of public opinion—Public Relations, New York.

What fed, or to be fed, to livestock and poultry in Canada during the 1947-48 crop season has been estimated preliminary as 18,926,000 bushels, as compared with 15,794,000 bushels in the 1936-37 season.

Time flies, no don't put quicksand in the hour-glass. 2775

Good Little Chinese

Children In New York's Chinatown Never Get Into Trouble

It has taken the New York authorities concerned some years to enlighten others regarding the exemplary conduct of local Chinese children. However the information is no less interesting than it would have been if supplied earlier. The organization which revealed to the world the unusually fine innate qualities of the little Chinese bears the slightly cumbersome title of the Joint Legislative Committee on Children's Court Jurisdiction and Juvenile Delinquency. The J.L.C.C.C.-J.D.D. is authority for the statement that among the 3,000 children in New York's Chinatown there has been only one case of juvenile delinquency in the past eight years.

The investigators went further and asked Chinese parents to what they attributed this record. The answer was as follows: 1. Among the youth the most severe punishment is to "lose face". 2. The child is taught reverence for his parents.

To-day more rice is eaten in the world than any other food.

No Puzzle For Him

Schoolboy Had Reason To Think He Knew Inspectors Age

An inspector of schools, determined to puzzle a class of boys, asked them this question in mental arithmetic: "If I had a field 100 yards long by 50 yards wide, and I employed three men for five days to plant it with seed potatoes at a guinea a hundredweight, how old am I?" The class was not unreasonably baffled, all except one boy who immediately raised his hand.

"Well," asked the inspector slightly taken aback to find his challenge accepted.

"Forty-four," said the boy.

"How do you make that out?" demanded the inspector.

"Well," said the boy, "I have a brother who is 22 and he's half-dad."

Sir Walter Raleigh grew Ireland's very first potato in a garden, still in existence, located at Youghal, 30 miles from Cork.

Adeline Patt, often referred to as the highest paid prima donna on the operatic stage, earned \$5,000,000 in her lifetime.

The Famous Blarney Stone

Belongs To Castle Built In Ireland During 13th Century

Americans disappointed by the failure of a syndicate to induce Sir George Goltthorpe, owner of Blarney castle, to allow the famous Blarney stone to be shipped to the United States on loan, may console themselves with the next best thing.

Two wooden crates, each containing a ton of limestone from a Blarney quarry, have been shipped from Cork to Los Angeles to the order of John Bodger, a resident of Hollywood. It is stated that the stones are to be made into tiny replicas of the famous Blarney Stone itself.

Sir George's objection to granting a loan of the Blarney Stone was that he could not be sure of getting it back at the end of the proposed seven-year period. Thousands of tourists visit the castle each year to kiss it so that they may be endowed with the supposed "gift of the gab."

In the Blarney neighborhood, the only magical properties the stone is believed to possess are those of attracting tourists.

The greater portion of the castle in which the Blarney Stone itself is said to have been built in the 13th century by McCarthy Laidir (Strong McCarthy), Lord of the Muskerry.

Origin of the term "Blarney" is traced to the delusive promises and evasive speeches of Cormac Dermot McCarthy, a descendant, when requested, according to a compact in surrender to the Lord President, Sir George Cawser.

Carry was the object of much ridicule at Elizabeth's court because of these protracted negotiations. On one occasion, when he had conveyed to her a particularly compelling statement from the Irish chieftain, the Queen cried in exasperation: "This is more blarney. What he says, he never means." And so the "Blarney" became famous in the English language.

"Bouquet de Laine, French royalist, wrote the "Marseillaise," only to hear it as the battle hymn of the opposing revolutionary army.

This Fog Was Costly

Tied Up Upper Queen Mary For 12 Hours At New York

The New York Post says no fog was dense enough to subdue the glitter that tied up the Queen Mary for 12 hours recently on the very entrance to New York. She was bright with the gleam of gold and silver in the amount of \$45,152,000; \$45,000,000 was in gold, \$152,000 in silver.

If there is any question in your mind that the fog doesn't run into money, consider that the Cunard White Star Line had to pay overtime to the customs inspectors and that the extra food bill, according to Chief Steward E. B. Pimbley, amounted to \$4,000.

The liner did not expect to serve breakfast as the Queen Mary was scheduled to dock so early; no first breakfast had to be served; then the boat was really trapped and lunch was served and before the fog and tide came to terms, dinner was served.

Instead of all 2,000 meals were served.

"In China a man doesn't know his wife until after he has married her."

"Why mention China particularly?"

If a battery is fully charged there is no danger of its freezing.

FAMOUS FRENCH BOXER IN NEW ROLE

Georges Charpentier, foremost in the ranks of contenders for the world's heavyweight pugilist honors of yesterday, shown at Stoke Poges, England, with his daughter, Mile. Jacqueline, who competed in the Girls' Open Golf Championship. "Gorgeous Georges" is still as dapper as in his fighting days.

Famous Pottery

Wedgwood Has Been Manufactured For Two Centuries

Two centuries ago Catherine the Great of Russia had a 901-piece set of Wedgwood pottery. Today Queen Elizabeth II. of England still signs her morning tea from Wedgwood. Added evidence that Josiah Wedgwood & Sons Ltd., keeps pace with the time was in the recent laying of a "corridor" in a new hyper-efficient, modern electric kiln outside Hanley, England.

Spoke, Milton, Staffordshire may bring glaze to collector's eye, but none of England's famed potteries has quite so hoary or famed a past as Wedgwood. The first Josiah set up for himself in 1759, nine years later built a factory on 1,000 acres of land at Hanley. He became famous for his cream-colored earthenware (called "Queen's Ware" for George III.'s Charlotte), was respected for improving turnpike roads, founding schools and chapels, was hated for espousing the cause of the upstart American colonies. But by his the Wedgwoods disposed of their land until a bare five-acre plot on which the plant still stands today.

There were pottery, mines, factories. Neighbors' smoke marked the fine finished of glazes. Wedgwood was sipping sherry from a "saw-tooth" mine made Wedgwood oven sink two feet; Hanley's congestion, for which Josiah, Lewis, Thomas and the place as a "non-city," blocked Wedgwood expansion. So the firm bought a wooded 400-acre plot miles outside the grimy town, planned a \$1,500,000 factory with electric ovens and a model town for 600 Wedgwood employees and one else who came to live there. Injuring the new plant, Wedgwood's assets total some \$2,000,000, but in a secret, but dividends have been paid every year since 1929-30 since the company's founding.

Wedgwood now boasts seven active direct descendants of Josiah I. Family tradition has it that the generation have a Josiah. Present Josiah are No. 6 ("Colonel Josiah"), who has been a Labor M.P. for 22 years and No. 7, who is managing director of the firm. No. 1's sympathy for the American colonies has proved prophetic. Of the 2,000,000 pieces of pottery the Wedgwoods make and sell for about \$10,000,000 each year, over 50 per cent. are sold in United States and Canada, where the favorite pattern is undecorated, unglazed, cream-colored. No vital in the United States market that when the company's representative in Manhattan, Kenneth Laurence Wedgwood, was made chairman in 1930, he stayed right where he was. The only thing which takes Chairman Kenneth back to England is the annual stockholders' meeting, tantamount to a family reunion since all stockholders are Wedgwoods.—Times.

A Priced Discovery

World Made Vitamins Conscious By Enthusiast Bio-Chemist

The fact that "vitamins" is now a household word is due entirely to Sir Frederick Gowland Hopkins, an eminent Cambridge bio-chemist, who has announced his forthcoming retirement, says N.Y. Times. For years he has been described as the "discoverer" of vitamins, because his existence had long been known. His great service to humanity was to establish their immense importance in ordinary diet, after a series of long and patient experiments on rats.

He made his experiments in a little cellar under the eaves in Cambridge, and soon discovered that rats were fed on a scientific chemically pure diet. They died.

If a little milk was added they lived. From that discovery has sprung the whole science of modern dietetics, which has as almost abolished rickets.

Canada And Jamaica

Flour, cornmeal, oats, barley, ham, pickled pork, condensed milk, lentils, beans, and potatoes were the principal agricultural exports from Canada to Jamaica in 1937 when the total of all Canadian exports amounted to considerably more than four and a half million dollars. As in former years, Canada was the largest individual supplier to Jamaica of goods classed as food, drink, and tobacco.

Havana, Cuba, has a large area that grows in real Pan-American soil. The earth around it was obtained from every country in the western hemisphere.

The tiny remainder of South America large from the water, rest in the surface vegetation, and repotes for hours with half of his body exposed.

All the rubins of the United States belong to one species.

Draw Tourist Trade

Completion Of East And West Highway Would Be Good Business

Here are two views on the value of the Trans-Canada Highway along the shore of Lake Superior:

George Gerbach, of Iron, Mich., who has just returned from a tour along the north shore, calls it a great country.

"That shore road west of the fault should draw heavy traffic," said Mr. Gerbach, "and when it is completed to the lakeshore it should be a big thing for the South. It will bring a great many tourists."

W. E. S. Bryan of Port William, a former resident of the South, raises another point.

The north shore road, said Mr. Bryan, would certainly mean a great deal to the tourist trade. But he also felt that the completion of the road was of great importance to Canadian unity.

"One of the difficulties in Canada at the present time," said Mr. Bryan, "is that the east knows very little of the west, and the west knows very little of the east. The west thinks it is underprivileged and the east is fed up with the west. These are the days of motor transport, and if there were a good road between the lakeshore and the rest of the country, there would be a wide, separated parts of the Dominion could travel over an all-Canadian highway, and the east and west would enter into closer relationship with each other, it would mean more Canadian unity."

Mr. Bryan's view is one to which governments should give full consideration, and that of Mr. Gerbach in his own way, and could result in a road which might be expected.—The South Star.

Laughed At Wrong Time

Nova Scotia's Late Politics Seriously Affected To Story

This story illustrates how seriously the Nova Scotia's late politics. When Sir John Thompson, because of the Prime Minister of Canada in 1929, the Maritimes were proud that one of their own was leading the Dominion Government. He was a highly respected and popular personage. When Sir John dropped dead during the winter after a long and arduous interview with Queen Victoria, there was genuine sorrow in Nova Scotia.

Five long years afterwards that young man was driving along a road in a sleigh. The sleigh slid off the highway at the edge of a lake. It started to drag both horse and driver into the water after it. The one leaped out, grasped the bridle of the horse and tried to avert disaster. When he failed for help at the top of his voice.

While he was bawling and fighting to hold back the ice and sleigh, the story goes on to say that a man came along, standing with his hands behind his back, the newcomer looked at his hapless victim and speaking slowly said:

"They tell me you laughed when Sir John died; well, — you laugh now!"

Story From Real Life

How Oppenheim, The Famous English Novelist, Won His Wife

Mr. Oppenheim is just completing his 151st novel. For many years past he has turned out two a year, by no means short stories and books of travel—as an astonishing record for a man in his 73rd year. Mr. Oppenheim is a Londoner, whose own hard-working life is in strong contrast with the gay, happy-go-lucky existence of so many of his characters. A story told about his marriage, however, might have been taken from one of his own books. He fell in love with the daughter of an American judge travelling in England. She loved him too, but her father told him bluntly to go away and improve his prospects. He wrote her for a year, and then, with a cheque for \$10,000 in his pocket, set off on his journey, where the young lady lived.

When he reached the house it was early morning, and nobody was up. So he sat on the doorstep to wait, and when he returned to England it was with his bride. They have one daughter, and live in Courtney road of the year.—News of the World, London.

The walking stick insect not only imitates a twig in shape, but color also. It gradually changes from green to brown as the green tinge taken on the brown color of the summer.

Before a man laughs at the awkward way his wife parks the car, he should see himself parking the car on his shirt.

A catnap is a monument to someone buried elsewhere. 2272

ECHOES OF THE SPANISH WAR

Railway Problems

Extra Service Necessary In These Days Of Kees Competition

I was interested to read in a recent issue of the Railway Employees' Journal the story of a lady and her two young children prospecting for a long winter trip, the lady went to a representative of a certain railway with a problem. She had a very young baby and she had to be assured that a supply of its particular kind of milk would be available under refrigeration.

"The railwayman," the article says, "figured the number of days and hours the trip would require, arrived at the quantity of milk necessary, reduced it to bottles, informed the mother whether could purchase a container to accommodate that number of bottles, and made arrangements with Pullman porters for prepping and icing on the trip."

The point of the story is that the traveler had gone to a passenger representative to get a service, which the same problem had been told, "Lady, I don't know anything about babies, it's not my line."

The trouble was, the second man was an old-fashioned railwayman. He failed to understand that in these days of keen competition the man who gets the business is the man who is prepared to be courteous, to make friends. Like every other business, the railways cannot afford to be inhuman. The railwayman, the public and serving the public means much more than carrying passengers expeditiously and safely. Everything that will add to the comfort is "in my line" to the railwayman.—Canadian National Magazine.

Speed And Happiness

Temps Of Action In Reflection Of New Year Mood

Buccoo or a bit of good luck which brings happiness is reflected in the tempo of our competition the man who has sudden cause for rejoicing he walks with a springy step until the first reaction wears off. It also seems to be the date of the first illustrations that press on the gas pedal. Some interesting illustrations were noted in police courts on a recent Saturday.

Case No. 1 was that of a young woman who pleaded guilty to driving at 50 miles an hour in a city area where the speed limit was 30. Her excuse was that she felt nervous. She was fined for her marriage approached. Her exuberance cost her \$20, which was tough on a bride.

No. 2 was that of an Aberdeen man who was caught on a bridge. "I was speeding," he said, "because it was the first day of my honeymoon." Even an Aberdeen man might feel it was worth \$10.

No. 3 was a girl whose car obstructed a pedestrian crossing and she was excused because she was "on her way to a jeweler's to collect her jewelry."

Then there was a man who stepped too hard on the gas because he had just been out of the hospital. Two dollars must come out of his first pay check.

Young motorist was fined no less than \$20 and \$10 costs for driving dangerously while under the influence of liquor. Reason—Mr. Hornum had been drinking for days and had been known to give officers a raise of pay and he had been "celebrating."—St. Thomas Times-Journal.

Have Run Into Trouble

Scientists Stride Into After Breeding Children Without Feathers

Science has run up another blind alley at the poultry department of Cornell University.

Jugglers at that sort of learning have succeeded in breeding a type of chicken without feathers. The breeding bird, says the Detroit News, it was discovered that the coat of heating hen houses prevent poultry from running on into more months far exceeded the cost of removing the pin-feathers from normal fowl.

It is all very baffling, and reminds one that we have bred a race of women who, hured to seminarily in most circumstances, 2 nevertheless most circumstances, nevertheless the path of human progress is inadequately marked with devious signs.

Gloom For The Brides

Each year the United States imports and consumes \$4,000,000 pounds of castor oil. The Agricultural Chemical Association is planning to try large-scale cultivation of castor plants in 22 states, figuring domestic manufacture of castor oil will lower prices and increase consumption to 400,000,000 pounds a year.

Mr. Wilkes: "I see your husband never gets out at night." Mrs. Nelson: "So do I."

Has Accomplished Much

Iranians Have Reason To Be Proud Of Their Shah

On the occasion of the sixtieth birthday recently of the Shah of Iran, all Iranians took a holiday to celebrate. After all, says the London Daily Sketch, they have something to celebrate. In just over ten years he has completed the Trans-Iranian railway at a cost of more than £60,000,000, and has provided for the most luxurious railway coach to run where there used to be nothing but mule trucks. He has also disbanded the powerful tribes with his modern army, and last year signed the Four Power Non-aggression Pact with the Persian neighbors of Turkey, Afghanistan and Iraq. His palace of Shah-Abed is a lovely piece of architecture and workmanship, settling against a background of the Alhambra mosque. The main building is patterned with delicately colored tiles, and vast balconies and fountains abound.

Getting Together

Saskatchewan Joins International First On Grasshopper Plague

First move toward a co-ordinated attack on grasshoppers by the state of North Dakota and the Province of Saskatchewan was made when Hon. J. G. Taggart visited agricultural officials in Minot, Bismarck and Fargo. Mr. Taggart is Saskatchewan Minister of Agriculture.

By this means, Saskatchewan becomes linked in an inter-state movement in the United States embracing 15 states.

Joint action on the part of Western Canadian provinces may result in an international line-up by which 11 states and provincial governments may present a united front against the grasshopper pest.

Water Level Control

Under a new convention between Canada and the United States the international joint committee will be empowered to control the level of waters in the Rainy lakes water area. It was announced at Ottawa.

Meteorites, although falling hot, cool so rapidly when meeting the surface that they have been known to fall into a hay stack without causing it to ignite.

Of every 100 persons in the Indian empire, 68 are Hindu, 23 Mohammedans, three Buddhists, three followers of the religion of their tribes, one is a Christian, and one a Sikh.

UNCLE SAM, TOO, BRUSHES UP HIS DEFENSES

Although the United States is some thousands of miles removed from the powder-bag of Europe, her defenses are put into good shape and soldiers are being trained vigorously. In the above photograph infantry of the Third Corps Area are shown at Fort Monro, Maryland, as they set up a 50 calibre anti-tank gun capable of penetrating the heavy armor of a tank.

A Canadian Visits The U.S.

Mr. G. S. Anderson, Of Ottawa, Writes To The New York Times

We liked the easy friendliness of your people and the courtesy of American officials whom we encountered. We liked your highways and we liked your drivers. They drive fast, but they drive well. We thoroughly enjoyed your scenery, your beaches, your resorts. We liked your coffee and we liked your tea, which is sometimes outgassed by Englishmen and even Canadians. We could go on all day outlining things which appealed to us.

We did not like being classed as foreigners. When you come to Canada, as you do in thousands each year, we do not look upon you as foreigners—cousins, perhaps, at least our guests, but not foreigners. Another thing that all Canadians and anything is the fact that you don't like our money. Close to the boundary our currency is accepted in small denominations, though not with any degree of favor. Ten per cent. exchange is levied on notes of five dollars or larger. Further inland Canadian currency is only rarely accepted at all.

Being the business man that you are, I know that you will welcome the mild criticism and will, I hope, take steps to rectify a condition which is very annoying to tourists from north of the international boundary.

Training For Youth

Quebec To Set Aside Large Sum For This Purpose

Hon. Joseph Robitaille, Quebec minister of municipal affairs and trade industries, announced the province will spend \$1,000,000 next year in furtherance of its policy of vocational training for youth, and will endeavor to place them in business and industry. Addressing the Quebec Federation of Chambers of Commerce, the minister said the plan started with \$150,000, was increased to \$325,000 last year and next year will be increased to \$1,000,000.

Too Many Months

Scientists estimate the skull of the prehistoric baluchitherium from 600 bone fragments that were dug up in the Gobi desert. It took one man seven months to piece the complicated "jig-saw" puzzle together.

"Belling bells," which have been popular recently in South Africa are being succeeded by "pronouncing bells."

Native Flowers Beautiful

Tons Exported From Sicily Islands To London Every Year

The recent record-breaking trans-Atlantic voyages of the Queen Mary have caused the name Bishop's Rock to be used frequently, as this is the point from which time is computed on the far side of the Atlantic.

This hard mark is in the tiny islands and is a lighthouse. The Sicily number 20 islands, only five of which are inhabited. The Gulf Stream winds in among these islands and the winter thermometer rarely goes below 16 degrees, making it possible for such as bloom in mid-winter.

Most of the Sicilians were fisher folk until an enterprisinglander sent a large sample of native flowers to London. The flowers were so beautiful that a London company was organized to "export" them. Now hundreds of tons of flowers are shipped to London annually.

There are upward of 200 varieties. From December to June practically all the inhabitants are employed in picking, packing and shipping flowers, which are sent to Penzance, Cornwall, by boat and then dispatched by fast train to London and other cities.

"Tennyson wrote 'Enoch Arden' while on a visit to the Sicily Islands."

Leads In Dairying

Manitoba Appears To Be Well Ahead In This Industry

Gladstone Creamery, of Gladstone, Man., captured the silver cup for the exhibitor making the highest score in creamery building at the Canadian National Exhibition, Toronto, and five other Manitoba exhibitors tied for second place. Manitoba has been called a second Ontario, but in the matter of dairying it seems to be taking precedence over its own brother and neighbor, states the Montreal Gazette.

Their Treat

Replying to the usual comments about railway meals being expensive, the Frederick Examiner quotes from the record to say that in 1937 the customer of the C.P.R. who paid \$1.42 for food and services was having \$1.42 spent on him. The C.N.R. spent \$1.52 per \$1.00 received. The second piece of pie in an Sir Edward Beatty and Mr. Hingertford states the Ottawa Journal.

The average farmer gets 40 bushels of oats to an acre, but the world record is 187 bushels to the acre.

It is all very baffling, and reminds one that we have bred a race of women who, hured to seminarily in most circumstances, 2 nevertheless most circumstances, nevertheless the path of human progress is inadequately marked with devious signs.

Each year the United States imports and consumes \$4,000,000 pounds of castor oil. The Agricultural Chemical Association is planning to try large-scale cultivation of castor plants in 22 states, figuring domestic manufacture of castor oil will lower prices and increase consumption to 400,000,000 pounds a year.

Mr. Wilkes: "I see your husband never gets out at night." Mrs. Nelson: "So do I."

POP CORN COURTNEY RILEY COOPER

CHAPTER IV.—Continued

"Of course," The Seattle girl extended her hand, a long-necked gesture—Jeanne Towers accepted it. Instantly. They smiled and exchanged greetings, suddenly Jack felt ill at ease and wondered why Jeanne Towers should be apologizing for her appearance. After all, they were the clothes she always wore. As for Kay, she had said nothing but pleasant things, some way seemed unpleasant. Jack Hammond could not understand it. He hurried to the other introductions. Then: "Won't you join us?" he asked. Jeanne drew back.

"No, no, thanks," she evaded. "I'm just going to have a bite. I've got to get back to the store."

Jeanne sought the farthest corner. A Chinese waiter approached, rubbing his hands on a dirty apron.

"Giving him, Jeanne said, "He's a steak, blare steak," he announced.

"Lay off the bear steak," Bruce Kenning warned. "It's tougher than old shoe."

"And don't talk about the vegetables," Hammond interjected. "They all look like a vegetable."

"Taste awful," announced Jimmy. "I want venison."

"Let's all have venison," Kay suggested, and with the order given, leaned back on the bench, her hands behind her. The idea of being snooty about a venison steak.

"What I'd like right now," said Timmy Moon. "Is a nice, juicy grub-stake, so I could buy another plate and make a lot of money out of flying supplies into this country."

Kay flinched a hand.

"I'll grubstake you," she said, "as soon as I make my first million."

Then she half turned, at a nudge from Mrs. Joyce. Her eyes swept the restaurant, pausing at intervals in a stare of appraisal. Hammond followed her gaze, knowing at what she looked and wondering as to the result.

Around the World Annie, accompanied by sons of her girls, missed the last of her meal at a nearby table. Kay appeared there.

All her full lips broke into the most exaggerated of a capital smile. Then she said in a low tone to her mother, "Quite interesting, isn't it?"

Hammond did not catch the remark. He only noticed that before Kay lowered her eyes, she had looked toward the corner where Jeanne Towers sat. It made him want to explain; he remained silent, however.

Then she said, "That he had not told Kay it was Jeanne who had procured the woman to do the housework at the cabin. Suddenly he felt weak. Around the World Annie had risen, lifted the crumple of her crumpled apron, and was heading straight for his table.

Again Hammond noticed that Mrs. Joyce nudged her daughter, again Kay looked up, then turned to animated conversation with Bruce Kenning. Around the World Annie came forward. Somewhat awkwardly Hammond got to his feet.

"Never mind that stuff," the dance-hall proprietor exclaimed. "I don't want to wait in. I want to know where I could send the pilot of that airplane."

Timmy Moon grinned.

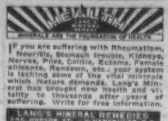

"To it," Around the World Annie raised her diamond-sparked hand to her blushing hair.

"I know now ain't no time to talk about it," she said, "you at dinner."

For Your Preserving

ALBERTA'S
PUREST
SWEETEST
SUGAR

Use It This Year

OF THE CHECKS AT EACH SIDE OF HIS

He raised a cigarette to his lips with a jerky movement, then snuffed the arm quickly down at his side. Now he hesitated, as if wondering whether or not to interrupt. At last he decided against further approach and turned again to the door.

Hammond saw him glance toward the corner where Jeanne Towers sat and stiffen as though with surprise. Then he heard a sound from the corner, half gasp, half scream, that was smothered almost before it began.

For an instant the two stared, as if each were petrified by the other's presence. Then the young man swung out the door, and Jeanne Towers, lighting mightily to prevent egress, returned to her neighbor's room.

CHAPTER V.

An hour later, Hammond saw the man again. The meal was finished and Jack was strolling through the camp with his guests. Kay had discovered a tremendous interest in everything about her; she could not wait until morning, she said.

So now, picking their way along the dark passages and trails which passed as streets, Hammond had done his best to give a picture of the place, its beginnings, its hopes. At last, tired, they had turned homeward, Timmy Moon hugging so much in the rear. Glancing back, Hammond saw the dim form of a man follow the aviator for a few moments—at last halting him. Timmy was late reaching the cottage.

"What's her name?" asked Timmy Moon.

"Around the World Annie," Bruce Kenning volunteered. "She's putting up a big dog house, and over on the Alaskan side of the line. Haman gets it finished yet; that's why they're all cutting over here."

"We would run into that bunch tonight," said Jack in heart-wholethanded enthusiasm. "I'd hoped to case Kay into all this stuff gradually."

"Oh, don't be silly," the girl said. Hammond beamed.

"Of course all right," Mrs. Joyce reached for her green folder. "Kay's no prude."

"Certainly not. Besides, I think all this is simply gorgeous. Then when I've found my claim and tied it up, I'll tell you."

"As if you'd have to hunt a claim," Timmy broke in. "Jack won't let you; he'd said as much for you."

"Is it rich?" the girl asked. "With good nuggets sticking out everywhere?"

Hammond fenced laughingly.

"Well, I can't say that. None of them are really rich. My partner was saying to-day that we'd do well if we got fifty thousand out of this mine."

Kay gasped.

"Only fifty thousand?"

"That's just one claim," Kenning interrupted. "Wait until they get into the real stuff."

"Where is it?" Mrs. Joyce had become interested. Hammond shrugged his shoulders.

"I wish we knew. We've all seen it."

"What you need," Kay interrupted. "Is a good geologist to help you find it. That's what Father always said—never go into a mining deal without having a geologist to tell you where to go."

Hammond toyed with his tiny fork.

"I wish we could do a little corner," he said seriously.

"Well," Kay slipped her hand toward Kenning. "There's your consultant."

Kenning laughed and called for her to assist the press-agent; Hammond remained serious.

"My partner's one of these old-fashioned fellows who don't believe in science."

"McKenzie Joe, you know," Kenning supplied. Born up in this country stuff. He was in this country stuff.

"But don't people get queer—staying away from civilization all the time?" Kay asked.

"Shushed, we call it," Hammond explained.

"Well, it amounts to the same thing," she laughed. "I know what I'd do if I had that advice. I just wouldn't say anything to him about it."

Kenning covered the situation with a laugh.

"That's a woman's viewpoint for you."

"Women are right sometimes," Mrs. Joyce added. Timmy fussed with his knife and fork.

"What that Yellow Peril would bring on the steak. I'm going to eat the tablecloth in a minute."

"It'll be long," Hammond answered, glad of the change of conversation. "I'll try to get hold of that Chinaman."

He raised his head, looking about the shoddy restaurant, only to pause as the door opened and a young man entered, paused a moment, then started forward at the sight of Hammond's party. He was a man Jack had not seen before; once well built, he now seemed shrunken away, as though his clothing did not fit, or as though he had robbed a frame, or as though he had been a victim of the disease.

He came forward, his eyes fixed on the man, and his hands extended to his features, drew lines about his mouth, a thickness

Timmy nodded. Kay Joyce shrugged her shoulders.

"How far is it from here to Winnipeg?" asked Timmy.

"To where?" Kay was yawning.

"Winnipeg, Alaska," Jack supplied. "It's about a hundred miles, all line."

"That's okay," said Timmy. "Fifty cents a mile is a hundred back for the round trip. Say," he queried, "there's a part of this lake that dips over on the Alaskan side of the line, isn't there?"

"Yes."

"Isn't pointing it out to me?"

"Sure. I'll be making an early get-away in the morning. Let's go outside."

"Well," said Kay, with another yawn. "If there's anything to eat, let's take a look at it. Come on, Mother."

(To Be Continued)

Long Canoe Trip

Take 600-Mile Journey Down the

As the canoeists were about to start, the difference between modern travel and traffic a century ago was driven home in three boatmen at Winnipeg recently.

Harry Busby, the 16-year-old son, Andy, and Murray Penn started out by canoe on the Assiniboine river from Brandon to paddle to Winnipeg.

The 10-mile trip ordinarily is made in about three hours by automobile but it took the paddlers 18 days to complete the voyage.

They estimated the winding river route is 600 miles in length and their one desire near the journey's end was to have a good meal.

They carried the canoeists' clothing and food for the nearest town.

The trip was made in a 16-foot canoe and they carried 600 pounds of equipment. Actual time on the water was about seven hours a day for 12 days. The rest of the time was spent on stop-overs.

There were many rocks and rapids along the way, Busby said, and the going was "tough" during the first four days. Nights were spent along the river bank in a tent. They started out about six o'clock each morning.

There were no spits, Busby said, although about the rapids swirled the boat around and they shot down the river backwards.

Clever Pets

This Dog Has a Vocabulary of Sixty-two Words

How large is a dog's vocabulary? A Toronto man jotted down the words he heard his dog say, and he knows, and they totalled sixty-two, in addition to terms of endearment, which, of course, a dog recognizes by the tone of the voice. No doubt there are many dogs with larger vocabularies. The one in question became greatly excited when its master read over in its hearing its whole vocabulary came to him when he read "Haw," and proceeded to be "Dead dog," when that phrase, too, was read out—Toronto Star.

A penguin will continue to sit on its eggs during a blizzard, until snow covers all but its beak and eyes.

More than half of the Canadian eggs exported to the British market is handled in London.

The growers of India are combining to regulate the production of tea.

SIR EDWARD BEATTY MADE FREEMAN OF CANNBROOK

When Sir Edward Beatty, chairman and president of the Canadian Pacific Railway, attended Cranbrook's Pioneer Festival to receive the freedom of the city and hear himself extolled as outstanding Canadian and head of the company which 40 years ago forged the Crown's West Pass line of its great railway system into the rich Kootenay country. Sir Edward is now receiving a silver tray commemorating the occasion from Mayor T. H. Roberts. On Sir Edward's left is Judge G. H. Thompson, who serves him as a freeman of the bustling Kootenay city.

—Canadian Pacific Press

Some of the big redwood trees of California, known as the "Sequoias," are believed to date back 4,000 years before Christ.

Some horses are bred specially to produce hair for violin bows in Russia.

He noted the government had found practical a new low-cost hard surface road, which was being installed in certain parts of the north at a cost of \$2,000 and \$3,000 a mile. One of the great difficulties in the past, musk and bog land, was now being crossed by highway after swampy quicksand had been blasted, he added.

Advertising is about like cleaning a walk; it can't be done once for the season.

New Type Of Engine

Aero Engine Developed In England

Is Closely Guarded

A new type of aero engine, which has taken 2,500 skilled mechanics (two years to produce to the entire production of the Air Ministry, is on view in the de Havilland Aircraft Works at Edgeware, England.

It is the 100-hp. air-cooled, Gipsy Twelve, four of which are installed in the 16-seater Albatross monoplane in which the North Atlantic crossing is to be attempted.

Although designed by Major Frank Halford as far back as August, 1931, it was not until March, 1934, that the Gipsy Twelve's components began to reach the engine shops at Stag Lane.

There are 1,000 major components, apart from some 500 washers and nuts and spacers. They range from a gleaming steel crankshaft which weighs 30 lbs., 10 ounces, and a few odd drachms, to piston-rings which barely tip the scale at one ounce.

The Gipsy Twelve has attained its present form as a result of 2,500 hours on the test-bench and several hundred hours in the air, in addition to a 50-hour civil-type test demand, by the Air Ministry. The military test was carried out in conditions of the strictest secrecy.

It is claimed for the new type that it has a lower cooling loss than any other in production; and that it is the first aero engine, either air-cooled or liquid-cooled, to present in flight a streamlined form of circular cross-section unbroken by the excrescences of cooling air scoops or radiators.

SELECTED RECIPES

DATE NUT LOAF

3 cups sifted flour
2 teaspoons Calumet Baking Powder

1 cup brown sugar, firmly packed
1 cup chopped walnut meats
1 cup finely cut dates

1 egg, well beaten
1 cup milk
1 tablespoon melted butter or other shortening

Beat four minutes, add baking powder and salt, and stir again. Combine egg yolks and milk, add nuts and dates. Combine egg whites and milk. Bake in greased loaf pan, 12x4 inches, in moderate oven (350 degrees F.) one hour, or until done. Store overnight before slicing.

It Pays to Advertise in The Review

ALL OUR ADVERTISERS SAY SO

TEACHING THE YOUNG IDEA

Your boy may not have exhibited any particular signs
of genius but, if he is a normal youngster, he shows a
healthy curiosity about things. He wants to know what is
going on around him and what it means.

His teacher will tell you that his craving for knowledge
is just as natural and healthy a sign as a good appetite. His
brain gets as hungry for information as his body for food,
and it is just as important that it should be satisfied.

Nothing you can give him will provide such a fund of
interesting and varied information as a newspaper. A good
newspaper is a potent stimulus to thought and development.
It is the history of today, covering every field of human
endeavor. You will find few teachers who do not read a
newspaper. They know its value in keeping a mind alert
and in tune with the times.

Give your family this important advantage. It means
so much to young and inquiring minds.
